Re: Wooden Sign Holders for Drivers More Milk posters.

From: N. Falvestock

On March 19th, I ordered lumber for 15 sign holders and arranged to have these made by the carpenter at a total cost of \$2.89. An itemized account is attached. These sign holders are now being used to advertise milk - This was a student project (my own) but received Miss Stevens sanction. If the Store Board agreed to underwrite this bill, the stands would, of course, belong to them and could be used for any campaign they desired to put on. I plan to continue the milk campaign thru this term, with the Board's approval should they agree to financially support current expenditures. The cost of the paper is not excessive and I can carry that myself, should the Board not care to add that expense to the cost of the sign-holders. Paper amounts to approximately \$.25 - \$.50 per month -
