

From: Judicial
To: Members of the Community with cars

It is necessary to keep the "parking lot" in front of the new student houses (the one in front of the sculpture studio) clear of cars. That area must be clear in the event of fire, and it is a serious hazard for cars to be parked there. You are asked to follow the little sign which indicates parking and to leave your cars in the lot behind the grove.

It is important that you give us your cooperation in this matter. Eventually that cement area will be grassed in, and there will be no semblance of a parking lot. Until that time, cars in that area are prohibited.

Please remember that this prohibition is the result of a real public danger and do not park your cars in the prohibited area. Violators will be fined \$10. perx violation. This will be strictly enforced.

In addition, we are asked to remind you that parking near the delivery entrance to Commons or along the road leading to it obstructs the delivery of food and mail. Parking between the sign and Commons has become so frequent that the US Post Office is threatening to stop the delivery of mail unless the road is kept clear. Please do not park * below the sign on the delivery road to Commons.

Please do not further rotten relations with the US Government. Please cooperate.
