Dear Wendy:

Hello. I just read about the Judson project in Quadrille and am wondering whether the tour includes an L.A. installation.

If you are interested in having the show travel to Southern California (L.A. has the second largest # of artists in the world...after NY) please let me know. I might be able to assist you in finding a suitable site. It might be possible to have the show sponsored by the Dance and Art departments at UCLA and there are several galleries in town which might be interested.

As you know I have been working in the photography community for years (as a writer, producer, curator) and would be interested in assisting your project. If this interests you, please let me know (and send details...)

Are there monies for support staff in addition to shipping and insurance for the traveling phase of the show? (I can't offer my services gratis.)

Hope all is well. The project sounds interesting and I hope I'll get to NY during that period so I might see some performances. Read about you in the VV. Bravo. (Perhaps I'll see you in May--I am working on a short film on Barbara Morgan and depending on the shooting schedule I may make it up to Bennington for the 10th reunion of my class....Hope to hear from you/see you.) By the way, thinking of Judson and Bennington---how is Judith Dunn faring???

Best,

Irene Borger
