BENNINGTON COLLEGE JUDSON PROJECT EXHIBIT

Packing Instructions

There are eight (8) individual wooden boxes in which the Judson Project photographs are packed. The boxes were designed so that specifically numbered photos fit in their predesignated box. (See attached packing list). In packing the boxes it is imperative that the photographs get placed in the correct box.

In packing the boxes, follow the instructions below please:

- 1) Place the largest frame to go in that particular box vertically at the back of the box, with the back of the picture frame against the wood.
- 2) Place the piece of pre-cut cardboard against the glass side of the picture frame.
- 3) Place a second frame against this cardboard with the glass facing toward the cardboard.
- 4) Place the third frame in the box in such a manner so as the backs of the second and third frame are facing one another. Then repeat the process begun in step #1 until the box is packed with all the frames.
- 5) Fill in the excess space between box and picture frame with styro-foam pieces.
