TOWN*GOWN SPLIT?

Before you've completed your program for next fall, consider the advantages of teaching in the Bennington schools. Here are some of the more important assets to be gained from participating in this project: serious work in your field of interest, an opportunity to make significant contributions and changes in school curriculum, a testing ground for an interest in teaching, and a chance to participate in the building of understanding between the college and the community.

Keep in mind the increased feasibility and effectiveness of such involvement with the new released time plan. Under this plan social science majors and (possibly) other students will have the opportunity to commit one quarter of their programs to community work. However, for those who are not interested in the released time which will necessitate staying here over NRT to "make up" the two missing quarters of their academic program, spending one or two hours a week at the school will still be welcomed.

The faculty at Mount Anthony Union High School will be willing to adapt their courses to a specific Bennington student's interest or area of skill. There will be an opportunity to teach your own course in an independent study project. The Junior High would like to try experimental courses in the humanities and arts with Bennington students' assistance.

If you are interested in either discussing or committing yourself in a particular area please get in touch with one of the following people. The important thing is to act NOW!!
