THE DATE:

Monday, Nov. 10, 1941

You can well realize that almost any date named will conflict with some society's schedule. Therefore, please, if at all possible, clear the date at your end by moving conflicts back or ahead. If you have a Board meeting scheduled, good—simply come in a body to the Circuit Meeting!

COMMENT:

1. The date is satisfactory. We'll hold it clear. ()
2. The date conflicts; but we will clear it and reserve it. ()
3. The date given conflicts with the following event, which cannot be shifted:

THE PLACE: Schenectady, N.Y.

Twenty meetings for 11 states means that the place of meeting must be selected primarily geographically, and that even so, some Boards will have a few miles to go. In view of the importance of your meeting, which will occur just once, we hope you will want to surmount any reasonable obstacles. We suggest you arrange among your Board to go in two or three cars.

COMMENT:

1. The place is satisfactory. ()
2. It is rather far, but we will be there. ()
3. We cannot make it.
4. We will try to have _____ of our directors attend. (Aim for 100% of your Board, and your Manager—not just delegates.)
