

PETITION FOR IMPROVEMENT OF HOUSING FACILITIES

The lack of a suitable lavatory and rest room in connection with the sculpture and ceramic studios has become increasingly a source of inconvenience and embarrassment to those students who work there.

A toilet was installed in the basement of the Luening residence and is accessible only through the furnace room. This toilet is not kept clean and the room has recently been used to store painted screens and is necessarily frequented by janitors and workmen.

An increasingly large number of students are engaged in work in the sculpture and ceramic studios until it is now one of the larger departments. Work in these studios requires long continuous hours. For hygienic reasons, if for no others, this improvement is indicated.

This does not seem an unreasonable request and investigation will confirm the report. Work could be done during the coming winter recess when repairs and improvements are normally made.

Your consideration of this petition and any action taken upon it will be greatly appreciated.
