

Let's Light up the Fountain!!

The RPI Lighting Research Center has volunteered to create a design for lighting of the Fountain in Lincoln Square. The Lighting Research Center at RPI is the world's leading center for lighting research and education. Professor Jennifer Brons will conduct a graduate lighting design studio as part of RPI's Master of Science in Lighting curriculum. The class will design and present four proposals for North Bennington residents to evaluate. The proposals will be presented at the CAPA Symposium on the Bennington College campus at 1:45 on Friday, December 9th.

We are inviting you to give your inputs on
this exciting project for the village.

Fountain Lighting Proposal Presentations

Friday December 9th at 1:45

CAPA Symposium on Bennington College Campus
