OCTOBER 10, 2000
BENNINGTON COLLEGE

4:30 pm

Dickinson 148

The Evolution of Virulence and Antibiotic
Resistance in Diarrheal Diseases

OR

Adventures in the Land of Ooze

7:30 pm

Barn 1

What's Catching: The Startling Scope
of Infectious Diseases

Paul Ewald is a Professor of Biology at Amherst College. He has suggested that a much broader array of human ills and problems than is usually suspected (ulcers, atherosclerosis and heart disease, some cancers—perhaps some forms of Alzheimer's, schizophrenia ...) is at least partially due to communicable agents, especially bacteria.

BOTH LECTURES ARE OPEN TO THE PUBLIC
