

GALLEY

Due to the inadequacy of the space situation as it currently exists at the college for the practical implementation of teaching and the work of students in the Division (and we need not mention that occasional performances arise out of such situations), all classes in the Black Music Division will be indefinitely cancelled. It is the hope of the Division that those people who are in the position of power will alleviate this situation as soon as it is possible, since by their very apparent lack of foresight the Division has found it necessary to make it an educational matter.
