

April 29, 1964

Dear Mr. Belluschi:

I know you will be happy to hear that Edward Barnes has been invited to do the master plan for the Bennington College campus and design the new buildings as required by the expansion of the College. We are very pleased about this and are confident he will maintain the high standard set by the library and do something fitting, imaginative, and in tune.

I hope you know how appreciative we are of the help and advice you've given us so generously and disinterestedly on several occasions. You occupy a very warm spot in the hearts of many Bennington trustees, and your beautiful building will always be a source of delight and of pride.

Sincerely yours,

Mrs. John W. Nields
