Tech Tip of the Week

Most of our newer Konica printers use "green" drivers. This means that the default layout is double sided printing. If you are printing from Chrome and you don't see an option to change from double to single sided then you will need to click print using system dialogue. On that screen you will need to click on the drop down menu for Layout/Finish. You will then be able to choose single or double sided.

Follow the Tech Tip of the Week collection on Google Plus for more information and access to archived tips.
