

The Beauty Parlor Survey questions were given to 100 members of the community. They were selected from the list of people who use the Beauty Parlor. We received 58 returns from the 100, and not all questions were answered, on every forum.

Out of the 58 returns, the majority (27) use the Beauty Parlor occasionally - 15 use it once a week - 12 never use it - and only 4 every other week. In considering the hygienic conditions the majority of 35 thought them very satisfactory. The remainder (12) thought them satisfactory. And 45 feel the quality of work good - some added excellent. All but one thought the hours convenient. 48 people consider the prices fair, with emphasis on very fair. Only two felt the prices were a little too high.

We found that the occasional use of the Beauty Parlor correlates with the students' habit of taking care of their own hair etc. 27 people who use it occasionally, and 12 who never use it match up against 22 who are accustomed to taking care of their own hair: and 6 who do not use it for economic reasons. There were no other reasons checked for not using it.

There were no other comments than "perfect" - "couldn't be improved on" etc. - except for the one suggestion that the operator have at least 1/2 hour completely free for lunch. -
