How are we to allocate or
decide upon the use of these funds for
"Experimental Student Projects"?

Ed: The Senior Class requested that the NRT Committee determine the allocation of these funds. Helen says that she has a lively committee - which may well have good ideas. The group was interesting- this is an unusually large Senior Class gift - the vote was tied between a fund to spearhead the formation of a Futures Office and this fund for experimental projects. The latter won overwhelmingly in a runoff, but the students seemed to have lost conviction as to how the thing should be handled. All they wanted was to graduate and leave. They did indicate that the "experimental projects" should not necessarily be pursued over NRT.
