### Tech Tip of the Week

One of the most valuable tools on your Mac or PC is its screenshot tool. Whether you are sending an error message to IT@Bennington or just a snippet from a spreadsheet to a colleague in the Business Office, the screenshot tool can help make you more efficient.

- On Macs, CMD Shift 3 takes a photo of the entire screen, or you can press the Print Screen button on your Windows keyboard for PCs, and the screenshot can be pasted into any photo-editing software, like Paint or Photoshop. Screenshots from your Mac save to your desktop as a .png.
- On Macs, CMD Shift 4 lets you use your mouse and select a portion of your screen to take a screenshot of. On the PC, you can use the Snipping Tool – a program in Windows – to select a specific area of your screen to take a screenshot.

Follow the Tech Tip of the Week collection on Google Plus for more information and access to archived tips.
