

WE MEMBERS OF THE GRADUATING CLASS OF 1968 express our support for the student petition calling for radical reconstruction of Bennington College. We recognize the need for students to determine their own education, in order to make the College relevant to the student's total social and individual development, as she decides.

As evidenced on several occasions, student needs have little effect on the direction of education. Channels are closed for students to effectively propose change. Therefore, we call for students to come together in the fall to formulate what education should be at Bennington College.

We stress that in order to improve the quality of education, students must be involved in fundamental structural reform.
